**Artist,**  
**Dreambuilder.**

## ***On myself***

---

“When I discovered painting in 1986, I did not yet know the possibilities. I started to experiment with colours and materials. The shape of the developing paintings was hesitant at first and completely without harmony and dynamics. But after some years my paintings started to develop a life of their own. At that time I became interested in *dreams*. The preoccupation with my dreams was leading into a world full of adventures. ...the shapes and colours of my paintings emerged.”

Alexander Arnold, born 1970, is living in Filderstadt.
